# slim luxury

## Classic at its finest.

Your choice of luxury MDF or stainless steel cab, finished with stainless steel fixtures and automatic slim doors on the cab and landing. Refined elements include a touchpad phone on the cab operating panel (COP), and upgraded cab rollers for an ultra-smooth ride.

## Create a lifetime home

Your dream home deserves a dream lift. Adding luxury and convenience for today also provides easy accessibility for all, making your home barrier-free for years to come.

Whether you are renovating or building new, a Savaria home lift will enhance your home and its resale value. You demand high quality and excellent value for your investment; when you choose Savaria, you get the best of both worlds. A Savaria lift is luxurious value, built reliably – just for you.

## Customise your solution

Your home is a reflection of your personal style; your Savaria home lift can be too. Create the perfect solution tailored to your unique needs and design sense, from a wide selection of model and configuration options, finishes, and accessories.

Or, eliminate the guesswork with pre-selected finishes and features, designed to work beautifully together. Choose from three upgrade packages – slim luxury, ultimate black or glass elegance – created to bring you distinct styling and popular options at significant savings.

## Beauty, brawn & brains

Your Savaria home lift is built with care using reliable components to provide you with dependable performance, and to meet or exceed the strictest lift, electrical, mechanical and building safety guidelines.

Behind the beautiful exterior is one of the smartest brains around; the microprocessor-driven controller is demonstrably reliable and designed for up to six stops.

Choose from two feature-packed models with options to suit virtually any configuration: the Eclipse or the Infinity.

ultimate  
black

### **Make a bold statement.**

Blackened stainless steel fixtures and integrated touchpad phone on luxury MDF, with matte black automatic slim doors on the cab.

### **Savaria Eclipse machine roomless lift**

Luxury and convenience, in less space than traditional lift designs.

Requiring no machine room and minimal overhead drive space, the Eclipse is well suited for homes where space is limited. This design installs quickly and seamlessly, and provides a smooth and stable ride.

The Eclipse is also an environmentally-friendly choice; a counterweight system reduces motor effort – and therefore power consumption – and no hydraulic fluid is required. Durable chain drive technology means few wearable components, and lower maintenance costs.

Choose the Eclipse HD version with heavy-duty components and a commercial-style car sling for higher capacity up to 430 kg, and cab up to 1200 mm wide.

### **Savaria Infinity hydraulic home lift**

The ultimate smooth, quiet ride.

With gradual acceleration and deceleration, your ride starts and stops smoothly, automatically levelling at each landing. The Infinity's high efficiency hydraulic drive system is dependable – and compatible with the use of LEED-qualified Hydro Safe hydraulic vegetable oil – whilst the submersible pump and motor are whisper quiet. In the unlikely event of an emergency, simply pull a knob to manually lower the lift.

Choose the Infinity HD version if a higher capacity or larger cab size is needed – it is suitable for up to 635 kg and available with a cab up to 1370 mm wide.

glass  
elegance

**Clearly modern.**

Framed glass automatic slim doors on the cab and landing open into a glass cab with melamine COP wall in your choice of colour. Upgraded finishes and a touchpad phone complete the look.

## luxury standards, unlimited options

Create your own personal lift from our wide selection of options. Choose from a range of cab styles and sizes, then select your finishes to complement and complete your solution. You can even have your own contractor finish your lift on site.

### Lift Cab Interiors

Our standard lift includes your choice of melamine or unfinished MDF, and white ceiling with four LED pot lights. Or, select upgraded scratch and fade-resistant luxury MDF panels – choose from a variety of colours and finishes. We also offer an alternate cab design featuring dramatic stainless steel panels on both sides with laminate walls.

## Choose from automatic sliding or traditional doors...

### Automatic Slim Doors

Add convenience and an elegant, modern appearance to your Savaria home lift with automatic slim doors. These commercial-grade doors can be used as a complete system, or in combination with a swing-style landing door. Finish in stainless steel, powder coated paint, or framed glass.

## Fixtures

Cab operating panels (COP) with and without phone

Stainless Steel upgrade on handrail

Brushed Brass upgrade

Blackened Stainless Steel upgrade

Handrails

to finish your home lift perfectly.

## Traditional Doors

Our swing-style door features attractive clear or translucent glass inserts and an aluminum frame finished with durable powdercoat in your choice of colour. Add an automatic opener for convenience and ease of use.

# specifications

## Standard specifications

- Capacity: 340 kg, 430 kg, 450 kg or 635 kg (Infinity only, code permitting)
- 2 stops with up to 3048 mm of travel
- Fully automatic operation
- Running speed: .25 m/s (Eclipse) or .18 m/s (Infinity)
- Illuminated automatic push button operation on hall call stations; in-use indicator lights
- Digital display (floor and directional indicator) in car operating panel (COP)
- Available alpha numeric button marking
- Homing feature
- 2030 mm or 2130 mm cab height
- 19 mm melamine or unfinished MDF cab trimmed in black, anodized clear or bronze aluminum; or 16 mm lamiwood trimmed with brushed stainless steel
- Surface-mount telephone
- 36 month limited parts warranty

## Safety features

- Certified lift door locks
- Emergency battery back-up for cab lighting and lowering
- Manual lowering with hand crank (Eclipse) or valve (Infinity)
- Audible “beep codes” cue user if action needs to be taken for unit to operate (e.g. close landing door)

## Drive systems

- Eclipse: energy efficient variable speed 2 hp motor drive with motor brake and slack chain brake system
- Infinity: self-contained submersible hydraulic pump and 3 hp motor; various speed valve with soft start/stop

## Optional features

- Automatic slim doors available for 2130 mm or 2430 mm cab heights, in standard 749 mm and 900 mm clear opening configurations, as well as custom sizes
- Power gate and power door operators
- Digital display hall calls
- Keypad phone or phone box
- See colour chart for details on finishes available

## Additional Eclipse options

- Machine roomless controller in hoistway
- Upgraded roller guides for a smoother ride
- Counter-weight safety brakes (necessary when habitable space is below lift)

## Configuration options

- Up to 6 stops to a maximum of 12 metres of travel
- Custom cab height up to 2438 mm (2743 mm clear overhead required)
- Concurrent landings/openings
- Eclipse HD: cab size of 1.6 square metres, and capacity up to 430 kg; cabs with clear width over 1060 mm and automatic slim doors have steel cab with choice of overlay panels
- Infinity HD: cab size up to 1370 mm wide, and capacity up to 635 kg
